

WITWorks Co-op and Job Search Tips

Search for Posted Co-ops and Jobs

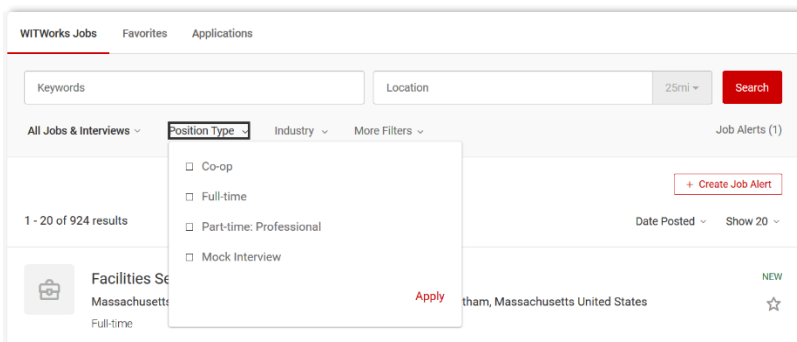

Searching for your next co-op or full-time job through WITworks is easy. You can customize your search using filters and save your search, so the system emails you when new jobs get posted.

To search for co-ops or jobs, select **Jobs > WITWorks Job** from the left-hand menu. To access search filters from the WITWorks Jobs screen select "See all jobs".

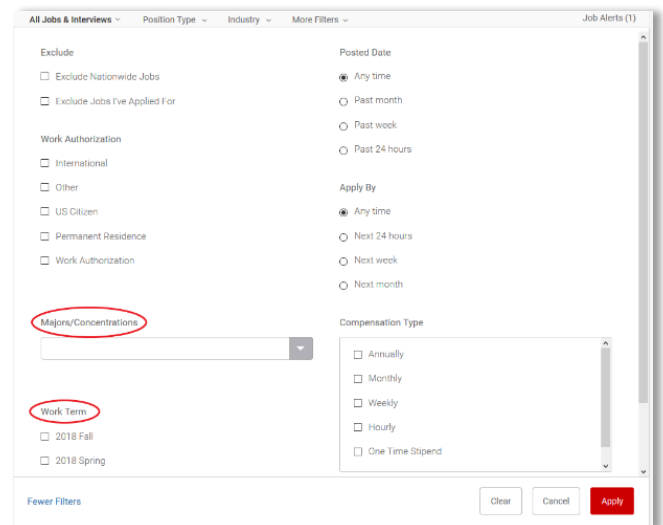

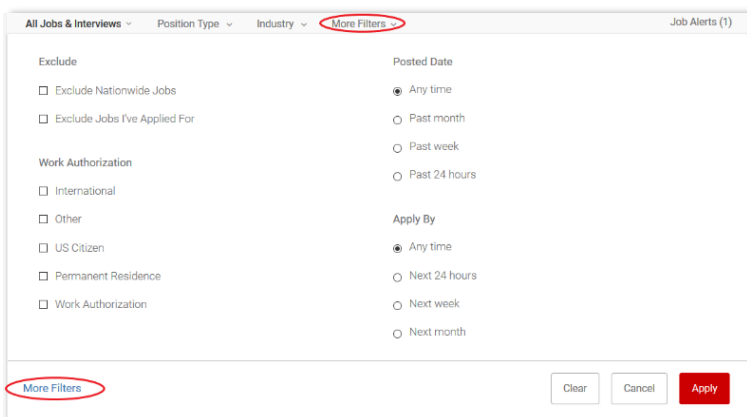

Add your position type from the header filters:

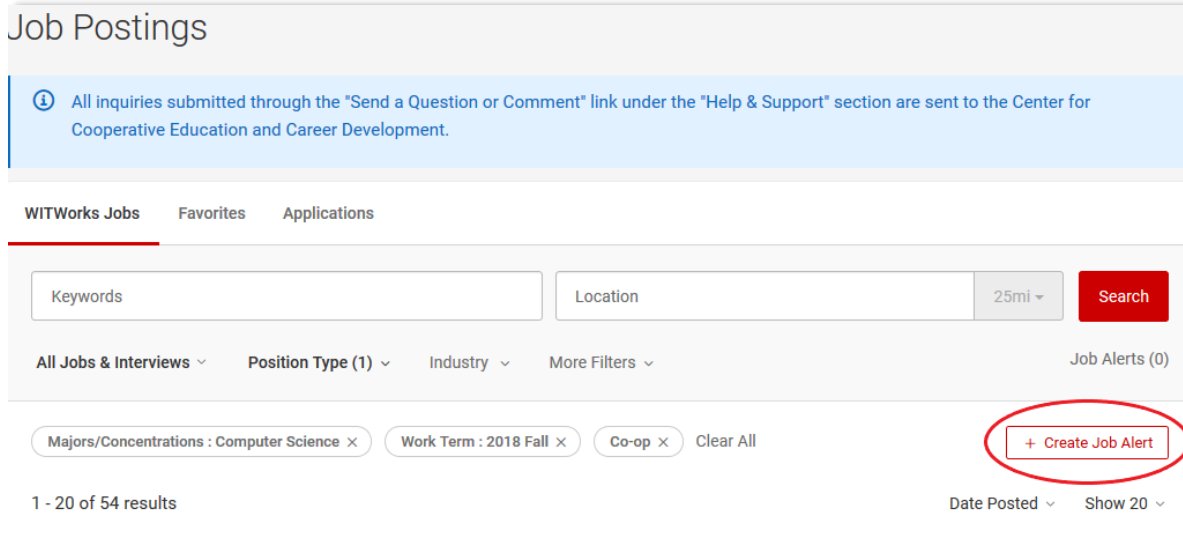

*Note: employers do not use "Industry" in their job postings, therefore the most relevant jobs will be found by searching your major. Do not select an industry in your search.

Add your major and work term via "More Filters"
(you will need to expand "More Filters" twice)

Saved Searches

A saved search allows you to save the search criteria you entered so you can run the same search again and again. You can also set your saved search to run automatically and email you when new jobs are posted. To save your search once you've customized the results, select "Create Job Alert"

Job Postings

All inquiries submitted through the "Send a Question or Comment" link under the "Help & Support" section are sent to the Center for Cooperative Education and Career Development.
